

Professional Focus

Front-End Architect with 10+ years of experience building scalable, modern React applications. Currently the sole Front-End Principal at Dscout, setting architecture and technical direction for the org. I focus on transforming complex codebases through best practices, upgrades, and architectural modernization, and I enjoy the collaborative, iterative side of the work: partnering with engineers, designers, and stakeholders to refine ideas into intuitive, high-performance user experiences that drive brand growth and user retention.

Skills

Languages & Frameworks

React, TypeScript, JavaScript, Next.js, SvelteKit

State & Data

Zustand, GraphQL, Apollo, Redux

Styling & Design Systems

Tailwind CSS, Radix, Motion, design system architecture, WCAG compliance

Experience

Dscout — Chicago, IL

PRINCIPAL ENGINEER

2024 — Current

- Promoted to Principal Engineer after 2 years as Lead Front-End Engineer.
- Architected Design Your Study, an agentic AI-powered study builder, and AI Moderator, an AI research moderation tool spanning user-facing session support and analysis.
- Founded and led development of Strata, a new design system built on Tailwind, Radix, and Motion, delivering fully accessible, atomic components across Dscout's product suite. Owns system creation and publishing.
- Rebuilt the Full Session Viewer using Zustand and a finite state machine architecture, significantly improving performance and eliminating desync bugs.

LEAD FRONT-END ENGINEER

2022 — 2024

- Architected the Usability Testing Suite, Dscout's most complex product to date, integrating full session capture and transcription across multiple analysis pathways, including a session viewer with clipping and tagging and Figma integrations for heatmapping and click detection.
- Led the React 18 migration and an equally challenging React Router v7 upgrade across a large monorepo, coordinating with engineers across multiple teams.
- Shipped dozens of features leading small cross-functional pods (2–3 engineers plus product and design).

Agot.AI — Chicago, IL

FRONT-END ENGINEER

2021 — 2022

- Built rapid-iteration SvelteKit visualization and tagging tools for Agot AI's computer vision models, tracking food prep progress via CCTV and drive-thru lane vehicle movement.
- Continuously adapted visualization and reporting logic to keep pace with evolving model capabilities, feeding structured feedback back to CV engineers.
- Prototyped consumer-facing concepts, including a Kitchen Display System (KDS) integration.

MERGE — Chicago, IL

FRONT-END ARCHITECT

2021

- Brought in to modernize the team's front-end practice, transitioning from jQuery/vanilla JS landing pages to maintainable, well-typed React/TypeScript applications.
- Led adoption of React/TypeScript for larger e-commerce integrations, including Hybris, drawing on prior experience from Enterprise Car Rentals at Isobar.
- Built a fully 3D, interactive timeline experience for Liberty Fund using React Three Fiber, with rich animation and navigation through pivotal moments in the history of liberty and freedom ideals.

Isobar — Chicago, IL

FRONT-END ARCHITECT

2020 — 2021

Earned an off-cycle promotion to Front-End Architect in October 2020 in recognition of leadership on Enterprise's COVID-19 rapid-response initiative.

LEAD INTERACTIVE DEVELOPER

2019 — 2020

- Promoted to Lead Front-End Developer for Enterprise Car Rentals' flagship website and rental experience, coordinating directly with client teams and high-level stakeholders.
- Led Enterprise's rapid-response initiative during COVID-19, architecting a fully no-touch rental experience to replace their traditional white-glove, full-touch service model under compressed timelines, spanning web, mobile, and in-location kiosk platforms.

SENIOR DEVELOPER

2017 — 2019

Built a complex, data-driven dashboard for the US Air Force to track nuclear assets nationwide over a year-long engagement, implementing advanced filtering, faceting, and virtualization for large datasets.

Education

DePaul University — Chicago, IL

2014

Bachelor's Degree in Interactive Media — Concentration in Interaction Design
